

Freedom of Expression !

Perfecting the Art of Vertical Mobility

Johnson Snapshots

- ▲ Johnson Lifts are the pioneers in vertical transportation over 6 decades in India.
- ▲ Number one in sales volume since 2009.
- ▲ 300,000 square metres is the total area of our three lift factories with a combined manufacturing capacity of over 18,000+ units/ annum.
- ▲ We have fourteen lift models to suit every budget and need.
- ▲ Currently, we have over 1,00,000+ units under Annual Maintenance Contracts in India.
- ▲ Johnson manufactures heavy duty escalators in a 20,000 square metre factory in Chennai.
- ▲ We offer a wide range of escalators and travelators to cater to the needs of every sector.
- ▲ We operate from 80+ branches in India and 10+ offices overseas, with over 9,000+ Employees worldwide.

At 155 feet, one of the tallest lift testing towers in India at our Chennai factory.

The inside story

"Sukranti is manufactured at Johnson's three lift factories: two units in Chennai and one in Nagpur. The facilities are world-class in every way, from cutting-edge equipment to quality processes, and from the skills of our manpower to the brains in R&D. So when you buy a Sukranti, you get the best in the world."

Hi-speed auto-loading CNC turret punch in action

Micron-accurate CNC press brake

The Salvagnini automatic line.

Breakthrough advantages !

Sukranti the lift without a machine room, is the next generation in vertical transportation.

Save energy.

Sukranti's gearless motor reduces your power consumption by 60% and increases efficiency around 80% by:

- Reducing start up current
- Saving electricity - the busier the lift, the more the saving as a result of high efficiency.
- Less heat generation, greater efficiency of motor as it runs at a lower rpm.

Save the environment.

Sukranti is a green lift for greener buildings. The gearless motor requires no lubrication and zero maintenance. No oil means no pollution

Smoother ride.

The speed control works with closed loop feedback from the encoder to ensure safe and smooth travel.

Save space

Designed to modular specifications that saves valuable space in the liftwell. This means cost savings and more marketable floor space.

Save in the future.

Sukranti's gearless motor has only one moving part and the bearings are completely sealed. It generates higher lift travelling speeds at much lower motor speed. All this adds up to trouble-free, smooth operation for decades to come.

Save your health

EyeRis: Contactless, virtual lift operating app.
A Johnson innovation for your safety.

Available on Google Play Store and Apple App Store, Compatible with Android and Apple IOS. EyeRis connects your smartphone to your lift system using QR code technology and lets you operate your lift by just tapping the buttons on your screen.

Now, you can be sure your lift experience is not only smooth, but also safe.

Enviably Features

- No machine room: compact controller fitted in the lift shaft
- Max. travel speed of 2 mps
- Upto 78 metres travel height (27 floors)
- Maximum load of 1768 kg

TFT Colour Display Easily customisable to display notices and advertisements, only for specific models

VVVF Controller The Variable Voltage Variable Frequency (VVVF) control, ensures 50% energy savings. It also creates comfortable ride quality with jerk-free starts and stops; Smooth acceleration and deceleration, and no landing variations, time after time. In the long run, this prevents wear and tear of components, which means less downtime and huge savings on spares

VVVF Door Controller Silken smooth door movement. Advanced features like adjustable independent times for opening and closing. Slow-nudging feature ideal for high traffic situations.

Stainless Steel Buttons Sophisticated design -buttons flush with backplate. Orange LED illumination. Tamper resistant Etched numbers. Braille markings.

Overload Indicator There will be an audible "overload" announcement as well as a message in the display panel.

Fireman Switch To enable fire-service personnel to take over complete control over one or more lifts.

Hall lantern with gong Landing fixture with illuminated arrow to indicate the direction in which the lift is heading and ringing tone is sounded as the lift stops at the landing.

Floor Annunciator Recorded voice announces the floor number on arrival. Accompanied by pleasant music.

Automatic Rescue Device - ARD

Automatically takes the lift to the nearest level in the case of a power interruption.

Door Frame Only Johnson Lifts come with door frames in Decorative Laminated Steel Sheet (DLSS) that gives strength as well as an elegant appearance.

Full Height Car Fixture Designed specially for tall buildings. With Press & Speak facility.

Infra Red Screen Sensor Curtain of 212 infra red beams to prevent accidental closing of the door.

Compact Logix Control Panel fitted on front fascia of top landing.

Sukranti Gallery

As you turn the page, imagine you are stepping into a wonderland of lifts.

Here, you can choose from the most luxurious finishes, hi-tech operating panels, sleek false ceilings and more. The best the world has to offer for your most exclusive customers.

Select from the range of options and create your own work of "art"!
